## DETAILED ACTION

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claim 1 is rejected under 35 U. S. C. 102(e) as being anticipated by Lee et al. (US 6,828,229, herein after Lee).

Lee discloses in figs. 6-14 a manufacturing method of a semiconductor device in which wiring made of metal is formed of a multilayer structure, wherein an interlayer insulating film for electrically isolating the wirings from each other located above and below or side by side is formed of an SiOC film 510, and an SiC insulating film 410/450 having the difference in Young's modulus from SiOC film of 50 GPa or the difference in stress from SiOC film of 15 MPa is formed so as to come into contact with said SiOC film 510.
